

INVO LED SKY Panel

The new INVO LED Panels use the very best LED chip. They are LM-70 tested and compliant, therefore assuring you of a long life. They use an optimised LED driver designed for use with these LED Panels so that maximum savings can be achieved. With a huge lumen to wattage ratio, the INVO LED Sky Panel offers the very best in light output whilst significantly reducing your electricity bills. Available with proximity, LUX and daylight harvesting sensors.

- > Tp(b) Rated polycarbonate lens
- > 130 Lumen per watt
- > Only 33 watts
- > Non corrosive and shatter proof
